

METALLA Guide for Authors

The journal METALLA is a platinum open access journal where publication is free for authors and all content is freely accessible to readers. The online journal does use fixed publication dates. Therefore, we offer our authors the possibility of publication throughout the year. In case of positive reviews, the articles are usually published within six months of submission. The print version of the journal is published twice a year from the articles published online.

Articles submitted must be original texts only. They will be subject to double-blind peer review as described in our peer review guidelines.

Checklist for submission preparation

As part of the submission process, authors must comply with the submission guidelines. Submissions that do not comply with these guidelines may be returned. The content of the article must be up to date with the current scientific discussion and meet the stylistic and bibliographical requirements described in the author guidelines.

If your native language is not English, please make sure that your article is checked for style, wording and grammar before it is sent to the journal's editorial office.

Only articles that have not yet been published that contain original material will be considered.

Articles should be submitted by email to the Managing Editor at the following address:
metalla@bergbaumuseum.de.

Copyright

In order to publish the article, all authors must sign a statement confirming that they have the right to publish the information and images submitted and that they agree to the conditions for publication.

Authors are responsible for having written reproduction permission and the appropriate authorised files for any copyrighted material in their contributions. The author assures these written permissions as copyright holder for the relevant files/images/media for publication in METALLA under the international licence CC-BY 4.0 in the author contract.

The Creative Commons licence used determines the regulation of the use of images or other third-party material, unless a separate copyright is indicated.

Guidelines for the text

We ask that the work is less than 10,000 words including references, though exceptions can be made. The text of the article should be structured according to the following points, depending on the topic:

Title of the article (capitalized); Author; Keywords (5, lowercase, except proper names); Abstract; Introduction; Finds/Features/Material/Method/Sampling; Results; Discussion; Conclusion; Acknowledgements; References; Authors affiliation, E-mail address, ORCID-number.

The summary/abstract should be less than 300 words, summarizing the topic and the main results

of the work. Five words should be added to the list of keywords.

Please submit the text and captions in a word processing file (for example Microsoft Word, Apple Pages, or Open Office).

Tables may be embedded in the word processing file or as separate spreadsheet files. For decimals, do not use commas, use periods instead.

Photos and figures should be saved as jpeg or tiff files with a resolution of 300 dpi / 20 cm, CMYK standard.

Art work, illustrations, photos and figures should not be embedded in text. Each figure should be submitted as a separate file and numbered.

Please label all photos, diagrams, graphs, and illustrations as 'Figure 1 ...' and tables as 'Table 1'.

Each figure and table should be referred to in the text. Captions should appear in a list at the end of the article.

Carefully format of the reference list using the correct style. No abbreviations of journals.

Years should be given in BC/AD, AH, or 'before present' in this journal.

Supplements

Supplementary files can be added and will be linked to the article and accessible via the article's landing page. Files may be added with a size limit of 2Mb. Preferred formats are pdf, excel, jpg.

Language

The language of the journal is English (British or American, but be consistent), and we ask authors to be proactive in ensuring the quality of the language.

Citations

Please use the Harvard referencing style, refer to [ARU-| Universitätsbibliothek: Harvard System](#)

Use parenthetical citation, no space between page (p., pp.) and number

(author, year, p.1 or pp.1-2) one author

(author and author, year, p.1 or pp.1-2) two authors

(author, author and author, year, p.1 or pp.1-2) three authors

(author, et al., year, p.1 or pp.1-2) four or more authors

All (and only) cited reference should be in the reference list in the proper format.

Examples

In text:

(Slater and Jones, 1996)

(Green, Harris and Dunne, 1969)

More than three authors: (Green, et. al., 1969); Green, et al. (1995)
(Lawrence, 1966, p.124)

Brown (1994, p.32)

Brown (1994, pp.32-38)

(Brown, 1966 cited in Bassett, 1986, p.142)

Cormack (1994, pp.32-33) states that "when writing for a professional readership, writers invariably make reference to already published works".
